

RoamAD CEO To Discuss Key Muni Wi-Fi Network Design Issues At MuniWireless Conference

Learn about the key issues in designing and planning scalable and robust metro Wi-Fi networks

Auckland, NEW ZEALAND—June 18, 2006—RoamAD CEO Martyn Levy will lead two important and timely sessions on network design and planning for citywide Wi-Fi networks at the MuniWireless 2006 Silicon Valley Conference to be held June 19-21, 2006, at the Santa Clara Marriott in Santa Clara, California.

“As municipalities rush to facilitate the deployment of large-scale muni Wi-Fi networks in their cities, it is crucial that the decision makers understand and communicate their application and network specific requirements to key stakeholders. There must be a meeting of the minds in terms of requirements and capabilities across all parties involved,” said Martyn Levy, CEO, RoamAD.

“This will make it easier to select the right technology and architecture for the job. It is important that municipalities and ISPs understand that no two networks are the same, and that applying a cookie-cutter approach to citywide Wi-Fi will result in a mismatch between expectations and what is actually delivered. Designing a scalable and robust metro Wi-Fi network is not simply ‘File > Save As,’” he added.

The MuniWireless Conference covers the critical issues related to muni wireless & public broadband initiatives and provides a platform for key decision makers across the muni wireless spectrum to meet, learn and build new relationships.

Network Planning 101 & 102 Workshop: Monday June 19, 2006 09:00 - 10:30 and 11:00 - 12:30.

About RoamAD

RoamAD supplies carrier-grade converged wireless networks that are unmatched in flexibility, technical functionality and economics. RoamAD multi-technology networks are remotely upgradeable and optimized to support mobile broadband data and mobile VoIP/VoWiFi. RoamAD's radio-agnostic, software-based platform operates on XScale-based multi-radio nodes that are comprised of readily-available modular hardware components assembled in accordance with RoamAD's published hardware assembly guide.

RoamAD is a trademark of RoamAD Holdings Limited. All other brand or product names are trademarks or registered trademarks of their respective holder(s). For more information see www.roamad.com.
